

HOBO[®] ZW-ROUTER-EU

HOBO data router - EU version

The HOBO[®]data router routes data from networked HOBO data nodes to ensure that the data is transmitted back to the receiver.

Key Advantages:

- Simple, cost-effective solution for transmitting data from HOBO data nodes that are too far away from the receiver or whose signal is blocked by an obstruction or interferences
- Automatically determines the best path to deliver node data back to the receiver
- Improves the reliability and redundancy of data node networks
