ONSET HOBO U12 THERMOCOUPLE LOGGER CHOSEN AS ULTIMATE PRODUCT BY EE TIMES MAGAZINE

New 12-bit data logger ranked top "Ultimate Product" in Test & Measurement category

BOURNE, MA, January 7, 2005 — Onset Computer Corporation, the leader in reliable, battery-powered data loggers, today announced that its HOBO® U12 Thermocouple data logger has been chosen as the top Test & Measurement product in EE Times' Ultimate Products awards program. The quarterly program highlights top-rated products based on reviews conducted by EE Times editors and readers.

"Our expert editors select up to 10 of the most significant products introduced during the quarter — in each of seven categories — and then, using an electronic balloting mechanism, we submit these products with the accompanying editorial reviews to selected, qualified readers of EE Times and eeProduct Center," explains Marty Gold, executive editor of eeProduct Center.

"We're truly excited that both editors and readers of EE Times recognized the HOBO U12 Thermocouple as an important test and measurement tool," said Mark McSherry, president of Onset Computer Corporation. "Like all of our HOBO data logger products, the U12 Thermocouple offers users a very straightforward and affordable way to monitor temperatures without having to rely on cumbersome chart recorders or expensive PC-based data acquisition systems."

The HOBO U12 Thermocouple Logger is a self-contained, 12-bit resolution data logger for measuring and recording temperatures from a variety of thermocouple probes. The unit accepts any J, K, S, or T thermocouple, and provides high-accuracy measurements over wide temperature ranges. Accompanying graphing and analysis software (available for PC and Macintosh computers) enables users to launch and readout the HOBO U12 Thermocouple with point-and-click simplicity, and offers a number of other convenient features, such as one-click conversion of data for easy upload into spreadsheet applications and the ability to view multiple channels from a single logger on one graph. For additional product information, please visit U12 Thermocouple Loggers.
