

## ONSET ANNOUNCES NEW MOTOR RUN-TIME DATA LOGGER

### ONSET ANNOUNCES NEW MOTOR RUN-TIME DATA LOGGER

BOURNE, MA, May 23, 2012 — Onset Computer Corporation (<http://www.onsetcomp.com>), the world leader in data loggers, today announced the **HOBO® UX90 Motor On/Off Logger**, a matchbox-sized, LCD-display data logger for monitoring run-times of motors, pumps, compressors, and other equipment.

The new logger provides a simple and convenient way to record up to 340,000 equipment on/off cycle changes, and uses powerful graphing and analysis software to convert the recorded data into time- and date-stamped graphs. The logger will be used in a broad range of building performance monitoring applications, including HVAC/R systems diagnostics, compressed air systems monitoring, and general troubleshooting of motors, pumps, and fans.

Installation is simple. The logger quickly and securely attaches to motor housings via built-in rare earth magnets – without any wiring – eliminating the need for equipment lockouts. A large LCD visually confirms logger operation and a signal strength indicator ensures proper logger placement.

#### Powerful software

The HOBO UX90 Motor On/Off Logger leverages the power of Onset's HOBOWare® software, enabling users to plot and analyze equipment runtime data in a few simple steps. The software, which runs on a PC or Mac, features time-saving tools that allow users to batch-configure and readout hundreds of loggers in a fraction of the time it would take with previous generations. Additionally, the software features a Bulk Export tool that allows users to export data files to text format for use in spreadsheets and other programs.

#### Pricing and availability

The HOBO UX90 Motor On/Off Logger is available immediately from Onset in a standard memory model (**UX90-004**) capable of 84,650 measurements, and an expanded memory version (**UX90-004M**) capable of over 346,795 measurements. Pricing starts at \$85. Software and accessories are sold separately. Visit <http://www.onsetcomp.com> for pricing details and technical specifications.

#### ABOUT ONSET

Onset is the world's leading supplier of data loggers. The company's HOBO data logger and weather station products are used around the world in a broad range of applications, including building performance monitoring, ecological and agricultural research, and water monitoring. Based on Cape Cod, Massachusetts, Onset has sold more than 2 million data loggers since the company's founding in 1981. Visit Onset on the web at <http://www.onsetcomp.com>.
