

ZW-ROUTER

HOBO data router

Discontinued

The HOBO® data router routes data from networked HOBO data nodes to ensure that the data is transmitted back to the receiver. Wireless data router - receives sensor data from wireless nodes and sends to a receiver

Important Information

HOBO data loggers require HOBOWare software (USB interface cable included w/CD purchase) and a communications device. See compatible items below.

Features

- Simple, cost-effective solution for transmitting data from HOBO data nodes that are too far away from the receiver or whose signal is blocked by an obstruction or interferences
- Automatically determines the best path to deliver node data back to the receiver
- Improves the reliability and redundancy of data node networks
