

Soil Monitoring Station Technical Note

Product: HOBO® Micro Station

Summary: This technical note provides a solution for monitoring soil temperature and moisture.

This soil monitoring station provides an easy and cost-effective solution for logging soil temperature and soil moisture at up to three depths for use in research applications. The resulting data can be easily viewed and combined with other data in HOBOWare®. Mount a HOBO Micro Station as shown in the following diagram. This example shows a depth of 6 inches.
